

MERMEN WILL ATTEMPT TO BREAK RECORD

Members of Canadian Olympic Team Will Try to Smash Records

IN K. OF C. TANK

"Old" Boys Will Swim Relay Race With Senior Team

Two former Canadian Olympic swimmers will try to break a number of the Canadian records at the Novice Meet to be held on Thursday the 29th at the Knights of Columbus tank. George Vernot will try to break the new Canadian record for the long plunge, and if his past work is anything to judge by, he will in all probability succeed. Clayton Bourne will attempt to smash the Canadian record in the 50 yds speed swimming. He was one of Canada's representatives at Paris last summer. He won his heat but failed to win in the finals. Clayton is the holder of a number of indoor and outdoor records, and was also a member of McGill's Dominion Championship Relay Team.

R. H. Keffer has consented to play for the "old" boys in the polo match with the Seniors Team. He was a prominent member of the U. of T. water polo team from 1920 to 1922. He has also been on the U. of T. championship swimming teams of 1920 and 1922.

Campbell Elder, a member of the McGill Intercollegiate Championship team of 1920 will be in the water to play for "grads" on Thursday night. The "Old" boys are also going to stage an exhibition relay race with some of the present team. This will prove to be one of the features of the meet as all of the men have been swimming for the intercollegiate teams for some time.

The list of events and program has not been formally posted as yet, but will be published within the next few days. A very large number of new comers have signed up for the meet. In fact in some cases there were sufficient to run the race off in heats. Besides the regular events there will be a number of exhibition races by both graduates and members of the present team.

George Vickers and Victor Clarholm, members of the championship Relay team will stage an exhibition 100 yard race that should be quite close. Harold Fleck the Canadian back stroke champion and holder of the 40 and 50 yds back stroke records will give an exhibition back stroke swim. He will not try to break his record as he will be saving himself for the polo game but should swim close to record time as he is in perfect condition.

Laidley and Persons will stage an exhibition breast stroke race. This pair swam second and third to Stephen Ruddy Jr. when he broke the world's record in New York in 1921 in a dual McGill-N. Y. A. C. Meet. This race should be close as both have been training faithfully for it.

Of the seven men who represented McGill in their American tour of 1921, three, Fick, Ross, Laidley will be appearing for the graduates and three Vernot, Parsons and Munro, will be still on the McGill team. Laidley the other man has retired from active competition.

As tonight will in all probability be the last practice night Mr. Vernot requests that everyone that possibly can turn out to be at the bath at 5.30 p. m. Up until now a large number have turned out but there could be more present, and it will possibly be necessary for some to get over Friday night's dissipation.

BOOK ON FOOTBALL ISSUED AT QUEEN'S

Batstone Captains' Team Next Fall

A comprehensive summary of Queen's football triumphs of the past few seasons in a book called the "Three Years of Gridiron Glory", has been issued at Kingston.

Some features of the book are many illustrations, including group pictures of both Senior and Intermediate Champions; interesting write-ups of the captains and those handling the teams; scores of all games for past four years; names of Tri-Colour players since 1921; and a fitting introduction by Principal Taylor.

This book constitutes perhaps the finest of the many tributes paid to the football prowess of Queen's University.

MENDELSSOHN AND BRAHMS TOPICS

At R.V.C. Music Club, Miss F. James to Sing

The R. V. C. Music Club is preparing another excellent programme for its next meeting which will be held on Thursday, January 29th at 4 p. m.

Hitherto the entertainments have been of a general order with musical numbers chosen from a wide range of composers. This time, however, the Music Club will devote its attention to only two Composers, Brahms and Mendelssohn, whereby the peculiar style of each may be more thoroughly studied and appreciated. The programme accordingly will be divided into two parts, one for each composer, whose biography in each case will be read introductory to the illustrations of his music which are to follow.

The paper on Brahms will be read by Miss M. Ratner, and the selections from his works will be as follows:—"Hungarian Dance"—violin solo by Miss E. Brooks "Waltz in a flat Major"—piano solo by Miss J. Banford. Songs—by Miss F. James. Mendelssohn's biography will be read by Miss Mae Murray and his works will be illustrated by the following numbers:—"Spinning Song"—piano-forte solo by Miss M. Benny. Songs—by Miss F. James.

The Music Club is honoured in having as their guest Miss Frances James, whose remarkable talent and charm as a vocalist has brought her much distinction in music circles. A cordial invitation is extended to all women students of McGill University and especially to those who have not yet attended a meeting of the Music Club.

Tea will be served at the end of the programme.

TRI-COLOUR BASKETEERS VICTORIOUS

Toronto Lose Game After Wonderful Come-back

26-25

Queen's Won Contest in Final Moments at Kingston Saturday

After their thrilling victory over McGill on Friday the Varsity basketball quintette lost to Queens at Kingston Saturday in a game which was fully as thrilling, the final score being 26 to 25 for the Tri-colour. The most sensational part of the game was in the second half when the Blue and White players ran up twenty-one points against their opponents' five. This gave them a lead of one point and for a few moments they had victory almost in their grasp. In the last minute of the game the honors changed hands when the local scored on a rebound from a foul shot which was given to Queens when the referee called a Toronto player for a very minor offense.

If that penalty had not been meted out the Torontonians would have had two victories to their credit instead of one.

The game was full of tense moments and a great shout of joy echoed through the building when the final whistle blew.

When the Varsity squad took the floor they showed the effect of their grueling contest of the previous night. During the first half Queen's had it all their own way, passing better, checking better, and shooting better. Consequently their score mounted rapidly and when they left the floor at the end of the period they had twenty-one points with only five

The Tri-colour success has in large part been due to Harry Batstone who was elected at a recent meeting to lead the team next fall. Batstone has been largely instrumental in bringing the championship to Queens for the last three years and both on and off the field he has shown himself to be one of the most popular players at the Kingston University.

THE RED AND WHITE REVUE TRY-OUTS

To-day — 4—6 p. m.
Tuesday — 4—6 p. m.
The Casting Committee of the Red and White Revue will make a preliminary selection of the cast for the Revue at the above hours.
All interested irrespective of faculty or department are requested to turn out.

McGILL JUNIORS TRIM ST. LAMBERT

Efficient Combinations And Fast Hockey Outstanding Features

McGill's hockey prestige was upheld on Saturday when the Junior team defeated in a most decisive manner the St. Lambert representatives of the Junior League by 5-1.

Coach Shaughnessy himself witnessed the game and commented favorably upon the class of hockey displayed.

In the first period the play was very fast. The speed of the McGill forwards, and their very accurate combination plays exasperated the St. Lambert defence. Shots rained in upon Smith, the St. Lambert goalie, who exhibited a stellar display of net-guarding. Near the end of the first period McGill surrounded the enemy's nets and Arnold was enabled to score the first point. A minute before the half time whistle blew Arnold scored again.

St. Lambert opened up in the second half but were unable to break the McGill combination. One of the early rushes resulted in a goal by Fry, but a few minutes later Gravel caught a rebound and netted the first point for St. Lambert.

Don. Smith and Fry both scored again for McGill, making the final score stand. McGill 5, St. Lambert 1.

The conspicuous absence of McGill supporters was not exactly encouraging.

The line up—	
McGill	St. Lambert
Goals	Smith, H.
Defence	
Gifford	Bennett
Smith D.	Gravel
Centre	
Arnold	Ferrie
Forward	
Dawling	Grant
Fry	Anderson

FIRST INFORMAL FOR THIS TERM

Novel Method of Serving Refreshments

Next Friday, the 30th, will be the date for the first Informal since Christmas. Rusty Davis and his popular orchestra will supply the synopated strains that gladden the hearts of the followers of the dance. Owing to the fact that one date was taken for the Plumbers' Ball there will only be two Informals this term. The second will be held on February 13th.

Acting on a suggestion by the college authorities a new departure in the manner of serving refreshments will be tried out. Instead of the usual supper a buffet lunch will be served.

This will allow more time for dancing and avoid congestion as there will be no need for all to seek a sustaining cup of coffee at the same instant.

The hours during which the lunch room will be open will be announced. Tickets will be on sale Wednesday and should be secured early to avoid disappointment. They will be sold at the customary price.

INTERMEDIATE "A" DEFEATED NORTH BRANCH

Good Basketball Displayed In Contest 34-20

Played as Preliminary to Friday Night's Senior Game

In the preliminary game before the senior intercollegiate fixture at the Montreal High last Friday night McGill's Intermediate "A" basketball squad triumphed over the North Branch Y. M. C. A. quintette by the score of 34-20.

McGill had the edge throughout and got away to a lead in the opening half which ended with the Red and White ahead 18-7. In the second the North Branch men held play more even and made some dangerous attacks, but their shooting was hardly up to that of the McGill forwards. The university team displayed some good combination. Loomis was their leading scorer, making four baskets in the first half and three more with two penalty shots in the second for a total of sixteen points. Davis counted.

(Continued on page three)

'VARSITY UNDERGRADS' DANCE GREAT SUCCESS

University College of Toronto Varsity gave a most enjoyable dance last Friday evening.

The dance is an annual affair and as usual was held in Hart House. Very artistic decorations, a daintily-served supper, and an entrancing orchestra all combined to make the dance a truly successful one, stated Douglas Everett who represented the McGill Arts Undergraduate Society.

CALDER SPEAKER AT ARTS BANQUET

Committee Meets To-day to Complete Arrangements

A few details remain to be settled for the Annual Arts Banquet, which will be held at the Mount Royal Hotel on Thursday evening, January the twenty-ninth. A meeting of the Committee will be held today for this purpose. The toast list is short and interesting. The principal speaker, R. L. Calder, K. C., is a prominent Montreal lawyer and one of McGill's foremost graduates. An District Crown Prosecutor, his name was for some time constantly before the public, especially on account of his part in the Delorme murder trial. More recently, he came to the front in a very lively debate with Clarence Darrow, the great American lawyer of the Loch-Leopold case. He is very much in demand at present, and the Arts Students are very fortunate in this opportunity of hearing him.

Sir Arthur Currie, Dean Ira A. Mackay, and Dr. Leacock have also consented to address the Students. Their excellence as speakers is unvarying and well-known. Many other professors will also attend.

R. V. Fortune, President of the Arts Undergraduates Society will officiate as toast master. The toasts will be proposed by Arts Undergraduates.

The ticket sale has been very encouraging. All men are advised to see their class representatives at once.

manner of serving refreshments will be tried out. Instead of the usual supper a buffet lunch will be served. This will allow more time for dancing and avoid congestion as there will be no need for all to seek a sustaining cup of coffee at the same instant.

PALESTINE IS JEWISH HOPE SAYS GARBER

Discusses Problem "Have Jews A Mission?"

CHOOSE DEBATERS

Brownstein and Schwisberg To Represent Circle

That the Jews have fulfilled an unconscious mission and that now all they could offer lies in Palestine and the potentialities of that remote eastern country was the opinion of Michael Garber, Montreal lawyer and a former student of McGill who yesterday addressed the Maccabean Circle at its first meeting of the year. Mr. Garber who is a past president of the circle, outlined briefly the manifold aspects of the subject "Have the Jews a Mission?" An enthusiastic and keen discussion followed the address.

The speaker pointed to the fact that the Christians believed that they must preach their gospel elsewhere and spread it. Hence the idea of having missionaries. The Jews, Mr. Garber claimed, never had such a mission consciously. They looked on Judaism as a thing to treasure up and accordingly locked themselves in their land with the aim of keeping out all other influences. Their mission came from their very being. Even as an individual contributes or acts as a retrograding factor in civilization so a group plays its part.

Briefly the speaker traced the Jews as they passed through Hellenism, and the influence of Rome, still clinging to their ideals. And when they came in contact with Christianity they also preserved Judaism. The conflict here was sharp—Christianity wanted the universal and could not tolerate the group.

And to-day with the Ghetto walls broken what is now the Jewish mission? In the realm of religion the Jews can no longer claim any attention from other peoples and yet they continue to live their life of segregation. But they do not know any longer what they are preserving. That is the tragedy of the western Jew.

The fact, however, that the Jew has thus lost himself makes for Zionism. He thinks in the way of those about him—and yet he is stamped as a Jew. The left-wing of Judaism, the reformed Judaism has reduced all to a minimum, and yet it is strange that the reformers can still believe that they have something to give to the world from a Jewish point of view. Logically this cannot be entertained.

The speaker scored what he termed the frivolity of the thing. "Is this all we can offer?" he asked. In concluding Mr. Garber urged that the trifling game of mind be abandoned.

Charles Brownstein, McGill student, and Arthur Schwisberg, McGill student, were chosen to represent the Maccabean Circle in the annual debate with the Toronto Menorah Society which will take place on February 21. Tickets for this event will shortly be on sale and the proceeds will be devoted to the purchasing of books for the Redpath Library. The Maccabean Circle has a committee which every year co-operates with Dr. Lomer in the buying of books concerning problems of Judaism and works by notable Jewish authors.

It was also decided not to send any cards or notices of meetings in the future. All announcements will be published in the Daily.

BILLIARD TABLES AT UNION REPAIRED

Billiard enthusiasts will rejoice to hear that the tables in the Billiard Room of the Union have been renovated. On Saturday last an expert spent the day in reconditioning the two far tables at the end of the room, and no longer will McGill men be able to complain of the condition of the Union tables. There has also been received the interesting news that in a couple of weeks time two famous

PLANS FOR REVUE ARE PROGRESSING

Many Innovations in The Scenery

The Red and White Revue of 1925 will receive added prestige and distinction from the list of Patrons and Patronesses. These include many of the most prominent people in Montreal.

Only with the cooperation of the students can the Revue be a success and so to encourage poster work among the students, a prize of \$25.00 and four other awards are being given for the best posters.

The arrangement of the committee has all been settled and the personnel of each will be later announced in the Daily.

A great deal of money has been expended in the building of special sets for the Revue this year, one set going as high as \$250.00. This set does not only measure up to the professional standard, but the act is one that can truly be described as the most ambitious amateur creation ever attempted in Montreal.

Some theatres of Montreal have kindly offered the loan of their scenery and the completeness of the scenic effects will give the Revue the appearance of a show run off by professionals.

A general Committee meeting of the Red and White Revue of 1925 was held on Friday Jan. 23rd.

McGILL TEAM DEFEATED BY LOYOLA 3-0

Intermediates Met With Defeat Saturday Night

FORWARDS WEAK

Most Goals Scored in Last Period

Last Saturday night at the Loyola Stadium the McGill Intermediate team met defeat at the hands of the Loyola College representatives.

The game was fairly even throughout but the Loyola forwards did better work and were much stronger on offensive tactics than were the McGill men. Reid who played goal for the Red and White team, played a good game throughout, stopping many difficult shots. Beaudry, the Loyola man in goals, also held up his end well.

In the first period nothing eventful happened, no scoring being done, and the forwards were evenly matched. The McGill forward line seemed rather weak and missed several opportunities to get to the Loyola's goal. In the second period he game continued in much the same way, with the exception that Loyola managed to score one goal. In the third period the Loyola men started an offensive, scoring two goals while McGill scored one, making the score 3-1 in Loyola's favour, at which work the score stood at time.

A large crowd witnessed the game, which was ably refereed by Roger MacMahon, Captain of McGill's Senior Squad.

The line-up was as follows—	
McGill (1)	Loyola (3)
Goals	
Reid	Beaudry
Defence	
McGerrigle	Britt
Smith	Noble
Centre	
Dion	O'Connell
Forward	
Sullivan	Hawkins
Thompson	Anglin
Subs	
Roncarelli	Eregeau
McDonald	C. M. H.
Pinhey	G. M. H.

Billiard experts will stage an exhibition at the Union for the benefit of McGill students. These internationally renowned billiard exponents are Woodward and Peley.

McGILL DOES WELL IN MANY SKI EVENTS

Meet of Intercollegiate Winter Sports Union Saturday

WEATHER BAD

No Records Made in Jumping Contest

Adverse weather did not succeed in hindering good results in the preliminary events of the Intercollegiate Winter Sports Union divisional meet held on Saturday morning at McGill. The main feature was the cross country ski run which produced keen competition, but which was largely confined to McGill men. The University of Montreal entered a few competitors but none represented Loyola.

There were twelve entries in the cross-country ski event, which started from the corner of Peel St. and Pine Ave. leading towards Mount Royal to Westmount and down to Core des Neiges, a distance of about 7 miles. The first four entries to finish were all McGill men. A big surprise was afforded when Thompson of McGill beat Tom Brown also of McGill and recently champion at the Quebec Carnival by a margin of two minutes. Thompson's time being 69 minutes 18 secs. Brown's being 62 minutes 16 seconds. Cowan of McGill was third followed by Steine. This left two other contestants who had both failed to finish.

Grimson, of McGill was the only entry in the Snowshoe cross-country race and covered the five miles in 34 minutes.

The University of Montreal obtained a first when Gendron of the St. Denis street college came in first in the Snowshoe Dash with Hurd of McGill second. Gendron did the 135 yards or so in 17.4 seconds. Mitchell and Murchison finished third and fourth. Murchison seemed headed for third place but just as he came to the finish line he went down and Mitchell passed him.

Three compulsory figures were given in the figure skating competition with two minutes allowed for individual display. R. Bolton of McGill intermediate champion of the Winter club ranked first with Campbell Brown, also of McGill, second. Desy of the U. of M. hockey team scored an easy first in the speed skating event. Both and Pickelman of McGill came in second and third respectively.

The Officials for the morning events were—

Starter—F. Van Wagner
Timers—G. H. Fletcher
H. L. Elliott
Col. Bovey
Judges—Col. Bovey
J. S. Brierley
W. L. Elliot

The first event in the afternoon was the ski proficiency test which took place before the jumps were held. Inclement weather greatly hampered the meet. The first five were McGill men. Rutherford led with 33 points. Costigan 32 points, Maxwell 29 and Webster came fourth with 27.

The jumps came off next, and were one hour and a half late and no records were made owing to the bad weather.

The final averages were as follows.

Lohan	92.4
Mitchell	90.6
Sproule	87.7
Olsen	85.7
McKinnon	84.2
McLaughlin	84
Rutherford (McGill)	80.7
Foster	80.3
Beauchamp (Loyola)	78.3
Martin "McGill"	78.1
Weir	77.0
Dingle	74.3
Watt "McGill"	74
Cave "McGill"	71

DR. C. B. KEENAN AT MEDICAL UNDERGRAD.

The programme for the regular meeting of the Medical Undergraduate Society, Monday evening, is an address on "Surgery and Surgeons" by Dr. C. B. Keenan, of Montreal. Dr. Keenan is one of the well-known physicians of the city and his name will no doubt cause a large attendance at the lecture.

The meeting is to be held in the New Medical Building and commences at eight o'clock. Refreshments will be served at the close.

THE SCARLET KEY

A subject which it is understood is being seriously considered by the Students' Council is the institution of a Scarlet Key Society at McGill. The name preceding "Key" is significant of the college colours and for that reason it has been suggested that the organization, if instituted here, would be called "The Scarlet Key Society".

The fundamental purpose of such a society would be the entertaining of members of visiting teams whether they be athletes, debaters or otherwise. Members of "The Key" would be elected, probably from the Junior Year, by the student body, and should be representative of the finest type of university undergraduate.

Similar organizations have been established and have existed for some time at several of the best American universities. At those universities competition is keen for the coveted membership, and it is considered one of the highest honours to be chosen one of the select group which assumes all the responsibility of impressing visitors with the hospitality of the institution visited.

McGill men have become acquainted particularly with the "Green Key" at Dartmouth. Their experiences of the workings of the organization there have been pleasant ones and their laudatory remarks concerning it are strong arguments in favour of instituting a similar "Key" here.

That this question is being considered by the Council does not reflect discredit on those who have willingly devoted their time and attention to entertaining visiting students in the past. It is thought, however, that the responsibility for such entertainment should not be borne by separate and individual societies but should be assumed by an official representative body which would be more capable of offering hospitality to visitors from other universities.

CONDENSED COMMENT

All students who have had any experience in acting or who are at all interested in the dramatic art are urged to be on hand for to-day's preliminary try-outs for the Red and White Revue of 1925, which are being held in the Union ballroom from four to six o'clock. All indications point to an exceedingly high class performance this year. Everything possible has been done by the management to make this year's Revue excel all previous amateur shows of such a kind ever held in Montreal. It is essential that the best dramatic talent in the university be included in the cast and in order that none may be overlooked the committee are holding these try-outs to-day and to-morrow.

MACDONALD WINS FROM THE JUNIORS

Close Basketball Game Ends With Score 13-10

In a close and interesting basketball game McGill Juniors lost to Macdonald College by the score of 13 to 10. As the score indicates the game was hard-fought and was in doubt until the final whistle blew.

The McGill team started off with a rush and succeeded in scoring a basket. The ball travelled speedily up and down the floor with little scoring on either side. The first period ended with the count 7-6 for Macdonald.

The second half was a repetition of the first with McGill having the advantage of play but the Red and White men were unable to score.

Macdonald College although outplayed took greater advantage of their opportunities to score and as a result when time was called finished on the long end of the 13-10 score.

Paige and Bennett were outstanding men on the Macdonald team.

Issenman and Covshoff played hard for McGill.

The teams:—

CLUB EXECUTIVES

Arrangements have been made with Notman's to take the following groups on the day and hour given below. To avoid confusion will any group which cannot follow this schedule please communicate with the Photograph Editor at the Annual Board room at the Union. The sum of seven dollars (\$7.00) must be paid at the time of sitting unless other arrangements have been made with the Annual Board.

MONDAY JAN. 26.

1.30 p.m.—Arts Undergrad.
2.00 p.m.—Physiological Society.
3.00 p.m.—Electrical Club.
3.20 p.m.—Dental Undergrad.
5.40 p.m.—Law Undergrad.

TUESDAY JAN. 27.

5.00 p.m.—Union House Committee
5.20 p.m.—Daily Editorial Staff.
5.40 p.m.—Science Undergrad.

WEDNESDAY JAN. 28.

1.30 p.m.—R.V.C. Undergrad.
2.15 p.m.—Western Club.
5.00 p.m.—American Club.
5.20 p.m.—Canadian Club.
5.40 p.m.—Chemical Society.

THURSDAY JAN. 29.

1.30 p.m.—R.V.C. Music Club.
2.00 p.m.—Societe Franciscaine.
5.00 p.m.—Cerele Franciscaine.
5.20 p.m.—Chemical Industry Club.
5.40 p.m.—Chess Club.

FRIDAY JAN. 30.

5.00 p.m.—Classical Music Club.
5.20 p.m.—Cosmopolitan Club.
5.40 p.m.—Choral Society.

MECHANICAL CLUB

Members of the above club will visit the plant of Jenkins Bros. on Wednesday afternoon, January 28.

The party will meet at the Union and will leave at 2 p.m. sharp.

"MEDICAL DANCE"

The designs for the Medical Dance are to be handed in to Crawford, New Medical Building, not later than to-day. The designs will be judged immediately and one ticket given to the winner.

JUNIOR LEAGUE POSTERS

A prize of \$30 has been offered by the Junior League of Montreal for the best poster to be used for the purpose of bill boards, advertising their forthcoming revue "Footlight Fancies".

All competitors should bear in mind that the posters must be in black and white and one flat color, and must embody the following: "The Junior League of Montreal presents Footlight Fancies, a Musical Revue Orpheum Theatre, April 21st-25th."

All posters should be sent to the Junior League Office, Room 205 Medical Arts Building, not later than March 2nd. For further information please phone Miss Mary Macintosh, Westmount 3936.

The width of the posters should equal to 21-2 times the length.

ARTS DINNER

The Arts Dinner will be held at the Mount Royal Hotel, on Thursday, January 29th, at 7.30. Tickets may be had from the following: R.V. Fortune, M. Lidstone, C. E. T. Jones, Lawrence Hart, Bill Murchison.

UPPER CLASS BASKETBALL
Any years wishing to enter teams in the Upper Class basketball play-off, should hand their entries in to Mr. Van Wagner, or J. R. Frith, Science '27, before Wednesday January 28th. Practice hours may be obtained from Mr. Van Wagner. No entries will be accepted after the above date.

WRESTLING

Monday, Wednesday and Friday, 5 p.m. at Strathcona Hall.

BOXING

Tuesday, Thursday and Saturday, 5 p.m. Molson Hall.

SUSPENSIONS FROM COMPETITIVE ATHLETICS

W. T. Adams, Theo. III.
S. B. Nadler, Arts III.

C.O.T.C. PHOTOGRAPH

A group photograph of all officers and non-commissioned officers of the C.O.T.C. will be taken at Notman's on Tuesday, January 27th, at 5.45 p.m. Dress—service uniform.

J. W. JEAKINS

Major, Adjutant,
McGill Ct. C.O.T.C.

CHESS TEAM

The following will please turn out for the match with Itherville, Wednesday evening at 8 p.m., at the Itherville Chess Club, 292 Workman St. Prof. Slack, Garelick, Lidsky, Kirsner, Garmaise Edel.

CHESS TOURNAMENT

The weekly meeting will be held this afternoon at 5. All are urged to come down and play off some tournament games.

LOST

At Plumbers' Hall, red leather case containing two keys. Finder please return to Harry at Engineering Building.

B. W. AND F

The Entry list for Boxing and Wrestling will be open until Saturday. Boxing list at Molson Hall and wrestling entries to be handed in at practices in Strathcona Hall.

R.V.C. '27

An important class meeting of R.V.C. '27 will be held in Room 2, R.V.C., to-morrow at twelve o'clock. For those who are unable to come at twelve, there will be another meeting at one o'clock.

R.V.C. A.A.

A meeting of the R.V.C. A.A. will be held to-day at one o'clock in the Common Room.
Business:—Awards and Hockey.

R.V.C. A.A. EXECUTIVE

The picture of the A.A. Executive will be taken at 1 p.m. to-morrow at Notman's.

M.S.P.E.—MACDONALD BASKETBALL

The third M. S. P. E. basketball match of the season will be played at Macdonald College, Thursday, Jan. 29th, at 5 p.m. The train will leave the Bonaventure Station at 4 p.m.

DELTA SIGMA SOCIETY

There will be a very important meeting of the Executive of the Delta Sigma Society to-day at one o'clock, in Room 2, R.V.C. Will every member of the Executive try to be present, especially the representatives from the different years.

R.V.C. '27 HOCKEY

Will all those who possibly can please turn out for hockey practices to-day, at five and to-morrow at four, as the first game is on Saturday.

R.V.C. HOCKEY SCHEDULE

Following is the schedule of the R.V.C. Inter-class Hockey games.

DATE	TEAMS	TIME
Tues. Jan. 27.	IV vs III	5 p.m.
Fri. Jan. 30.	II vs I	5 p.m.
Thurs. Feb. 5.	III vs II	2 p.m.
Thurs. Feb. 12.	IV vs I	2 p.m.
Mon. Feb. 16.	III vs I	5 p.m.
Fri. Feb. 20.	IV vs II	5 p.m.

HISTORICAL CLUB

The next meeting of the Historical Club will be held on Tuesday, Jan. 27th, at the residence of J. S. Buerley, Esq., 623 Sydenham Ave. Westmount, when W. S. Johnson, Esq., K.C., will speak on "Canadian Constitutional History". All former members are invited to be present.

PSYCHOLOGICAL SOCIETY

The picture for the Annual will be taken to-day at 3.15 p.m. at Notman's. All members of the executive are requested to be present.

PUBLICITY COMMITTEE

The Publicity Committee of the Red and White Revue of 1925 will meet in the President of the Council's room in the Union at 5.15 p.m. to-day. The following are requested to be present:—R. V. Fortune, A. F. Fowler, P. N. Gross, K. A. Henderson.

PERIODIC PHYSICAL EXAMINATION

(From American Medical Association Journal)

If there is any procedure that represents the apotheosis of the application of preventive medicine, it is the periodic physical examination. This is the most efficient method that modern medicine has for determining the ability of the individual human being to continue his life in such a manner that he may reach the age to which the tables of life expectancy indicate he is entitled. It is not surprising, then, that the idea has received the spontaneous and wholehearted approval of all the nonmedical agencies to which it may have been broached. Life insurance companies have recognized the commercial asset embodied in a wholesale adoption by the public of this method of detecting in their incipient some of the chronic diseases that have represented the greatest cost to these concerns. Social health agencies have found that the application on a wide scale of periodic physical examinations will secure a decreasing cost in the care of the indigent sick. Moreover, practically every medical organization has given the extension of periodic examination to the public complete endorsement.

The House of Delegates of the American Medical Association, stimulated particularly by the far-sighted policy of its leaders, was among the first to urge consideration of this problem, and the various councils and bureaus of the association were empowered several years ago to complete plans for extending the matter to the medical profession and for carrying a systematic campaign of education to the public.

It is significant that every one concerned in the campaign of education for periodic physical examination in extending this epoch-making method to the public has realized that it is a matter that depends for its success entirely on the extent to which organized medicine, as represented by the Fellows and members of the American Medical Association in the county and state societies, takes up the work. Practically every scheme for putting the system into effect on extensive scale has attempted to utilize the machinery of the American Medical Association for this purpose. Such attempts have included not only the work of individual life insurance companies but also that of self-constituted so-called philanthropic corporations, of medical institutions which planned to conduct physical examinations as a profit-making scheme, of various medical organizations consisting of groups within the whole of organized medicine, and, finally, of philanthropic health organizations which have a leaning toward "state medicine."

BASEBALL

Commerce '25—Arts '27 5.30 Tuesday, at Montreal High School. Winner plays off with Med. '26 Thursday.

BAND PRACTICES

There will be two practices this week, Wednesday and Friday at 5 o'clock in the Music Room and Ball Room of the Union. The next appearance of the Band will be on Saturday night at the McGill-Queens' Hockey match at the Forum.

Canada's Mineral Industry

(GEOGRAPHICAL SURVEY, DEPARTMENT OF MINES, CANADA)

During the year 1924 there was a marked increase in the production of metallic minerals in Canada. This increase was due mainly to a greater production of gold and nickel. It was offset, however, by a decided falling off in the value of non-metallic minerals produced, due in a great measure to a decrease in the output of coal. The production of metallic minerals for the first six months of 1924 and 1925 amounted to \$39,581,212 and \$47,496,946 respectively and of non-metallic minerals exclusive of structural materials and clay products to \$47,122,167 and \$36,844,256.

The prosperity of mineral industry is dependent on the general world prosperity. The recent trend of events points to a return to normal and prosperous industrial conditions and increased world trade. A feasible reparations scheme has been initiated that gives promise of a vigorous resumption of industry in central Europe; commercial pacts are being entered into; an approach towards a stabilization of European currencies is taking place and this will permit of safe forward buying. The United States presidential election has passed together with the hesitancy in business that precedes such an event; the return of one of the older conservative parties to power in Great Britain has removed a part of the uncertainty that hampered business; and the refusal of a big loan to the Soviet government may result eventually in an earlier return of Russia to normal industrial conditions. Clear sighted business men and financiers express confidence in the immediate future. The Canadian mining industry will profit from the stimulation of the market for minerals and metals that will ensue.

A brief survey of the status of some of the leading branches of the mining industry follows. Canada produces a greater variety of minerals than most countries but only a few of the more important can be touched upon in this short article of this nature.

Gold mining is a thriving and prosperous industry with bright prospects for the future. The greater part of Canada's gold is derived from lode deposits and comes from the provinces of British Columbia and Ontario, the latter producing four times as much as the former. Important developments have been announced from properties at the head of Portland canal, which should result if they are as good as stated in an increase in the production of gold in British Columbia. Considerable interest is still shown in the Pas and Rice Lake mineralized belts of Manitoba lying respectively to the north of the Hudson Bay railway and east of the south end of Lake Winnipeg.

In Ontario prospecting and testing of prospects have been carried on at a number of points but the greatest activity has taken place in the north-eastern part of the province in the large belt of auriferous rocks in which the ore deposits of Porcupine and Kirkland Lake are found. Great advances have been made in the development of hydro-electric energy and in the development of ore bodies in operating mines and in properties being prepared for operation. As a result the gold production of Ontario for 1924 greatly exceeded that of 1923. For the first five months of 1924 it amounted to \$15,171,106 as compared with \$14,577,315 for the first five months of 1923.

In western Quebec there was much prospecting and intensive exploratory and development work in those geological formations which have proved highly auriferous in Ontario and which extend east into Quebec. The results have been encouraging. The examination of prospects is being undertaken by mining and exploration companies of good financial standing. It augurs well for the future of the industry that this work is being done by companies that are in a position to make heavy expenditures and employ the most competent scientific and technical men to direct the work. Great use is made of the diamond drill in ascertaining the location and determining the character and extent of possible ore bodies. With the information thus acquired mining companies are in a position to adopt the most economical methods of recovering the metals.

A branch of the Timiskaming and Northern Ontario railway was extended during the year to Larder Lake. This will permit of more economical work in areas tributary to the branch in Ontario and in Quebec area to the east. The air transport

service into the Royal field which was conducted during the summer will, it is announced, be continued during the winter.

A development which it is expected will give renewed life to placer mining in British Columbia is the initiation of dredging operations in the Cariboo mining district. A dredge will commence operations shortly on Antler creek, where a careful examination of the quantity and gold content of the gravels had been made prior to the undertaking of construction work. Rich gold placers have been reported as discovered on Eagle river, a tributary of the Dease, northern British Columbia, and in southern Yukon some distance east of Cariboo.

The production of silver during the first six months of 1924 exceeded that of the corresponding period in 1923. South Lorrain, Ontario, will profit from the service of a branch of the Timiskaming and Northern Ontario railway that has recently been built into that field. This will permit of them shipment of low grade ores to the metallurgical plants of Cobalt for treatment.

Efforts are being made to extend the market for silver by encouraging its use for coinage and for table ware and household ornaments. The great depreciation of the European currencies since the war led to the use of cheap alloys and nickel for coinage. A great many people prefer a coinage having an intrinsic value and it may be that as financial conditions become stabilized there will be a return to the use of the precious metals. A great impetus would be given to the use of silver for table ware and for ornaments if research laboratories succeeded in producing an alloy of the metal that would not tarnish readily and that would retain the beautiful characteristic colour and lustre of silver.

The nickel industry has shown great activity and in spite of low prices resulting from the keen competition there has been a big increase in production. There are now but two companies carrying on mining operations, the British American Nickel Corp. after having passed into liquidation. It would be regrettable if with the extension of application of nickel in the arts and industries the splendid mining, smelting and refining plants built up by this company should cease to be active contributors to the wealth of Canada.

Although copper prices have stood during the year at a discouragingly low figure operations were continued at the three important centres that have for many years been the main source of copper in Canada—Anox, Britannia Beach, and Sudbury. Probably the most important developments were those that were made at Anox where the new concentrator was completed and put into operation. Ore is now being treated that is too low grade to be sent to the smelter direct. The large copper deposit which had been developed on Allenby mountain and which preparations were made to work during a period of better times in 1923 remains unexploited.

Large quantities of copper are being utilized, but it has to meet the competition of metals that can be used as substitutes. Aluminium has become a serious competitor for electrical transmission lines. The result is that in spite of efforts to popularize copper prices are not good and the market would be considered low for even pre-war days.

Ontario and Yukon continue a steady production of lead, but British Columbia is to be credited with the greater part of the lead and zinc produced in Canada. There are several mines, but the bulk of the ore comes from Sullivan mine at Kimberley, one of the foremost mines of the world. Since the erection of the concentrator at Kimberley the metallurgical plant at Trail has not been able to take care of all the ore offered and zinc concentrates are being shipped to Belgium for treatment. Plans are however said to be under way for increasing the capacity of the Trail refinery. Some idea of the growth of the lead mining industry may be had from the following figures of lead productions from Canadian ores:

1920.	35,955,717 pounds
1921.	65,679,592 pounds
1922.	93,307,171 pounds
1923.	111,234,465 pounds
1924 to June 30.	79,058,295 pounds.

Large quantities of lead are required for plumbing, electric cables, batteries and paints, and high prices

are ruling. As a result inquiries are being made into the possibility of bringing into commercial development some of the lead and zinc deposits of eastern Canada.

The offer by the Ontario government of a bounty of one half cent per unit on iron ore natural or beneficiated produced and marketed from Ontario deposits has unfortunately not yet led to a revival of iron mining in this province. The furnaces of Ontario are still being supplied with iron ore from the United States and those of Nova Scotia with ore from Newfoundland. The attempt to obtain a bounty from the federal government did not meet with success and the premier of Ontario has, according to press despatches, announced the intention of the provincial government to arrange for the payment of a bounty of one cent per unit. The receipt of such a bounty for a few years may prove sufficient to place the iron mining of Ontario on such a firm footing as to enable it to compete successfully in the end on equal terms with foreign ores.

The production of aluminium has made big strides in recent years. Large quantities of this metal are used in the automobile industry, for the manufacture of utensils for electrical transmission wire and other purposes. Although the electric energy developed from Canadian water power is utilized in the production of aluminium the raw material is wholly of foreign origin. In view of the growing importance of this metal greater attention might be given to a search in Canada for bauxite, the mineral from which it is produced. The areas most favourable to the occurrence of bauxite are those parts of the country, such as are found in some sections of British Columbia, in which there has been no glaciation or in which glaciation has not been so intense as to remove the residual products of rock decomposition.

There was a heavy falling off in the production of coal in 1924. This was due in part to lack of orders occasioned by slackness in the iron and steel industries and in other manufactures. It was due in part also to the long continued cessation of operations in important coal mines of Alberta. The output of the Canadian coal mines for the first nine months of the year was 5,143,337 tons. The output for the year 1923 was 16,990,571 tons.

The most encouraging feature in the petroleum industry consisted of striking of a flow of oil in a second well drilled at Wainwright. A flow of oil had already been struck in this district in 1923. Very heavy flows of gas were encountered in wells drilled in southern Alberta and in the Turner Valley field southwest of Calgary.

In Ontario the prospects for the petroleum industry are not bright. Ontario has been producing oil for sixty years and most of the wells have a capacity of only a few gallons per day. It is feared that when the payment of the bounty ceases, as it will in 1925, there will be a gradual plugging of the wells and a decline in production to an insignificant amount.

The asbestos mining industry suffers from the keen competition of the Rhodesian mines. Rhodesia has the advantage of cheap labour and is placing large quantities of the long fibre or crude asbestos on the market. There is a feeling also that unnecessary competition detrimental to the best interests of the industry exists among the companies carrying on mining and milling operations in Quebec. Some effort has been made towards effecting a better understanding among Canadian producers, but with little success.

Attention was again turned to the deposits in Deloro township, northern Ontario, and a quantity of asbestos was mined.

The year 1924 also saw the completion at Asbestos in Quebec of a plant for the manufacture of asbestos products. The company announces that for the present this new factory will specialize in the manufacture of asbestos roofing, asbestos packing, and asbestos brake lining.

The high prices paid for white arsenic has directed attention to the possibilities of Canadian sources. The principal source in Canada has been for many years the arsenides and sulpharsides of cobalt and nickel of the Cobalt silver mining district. During the year mining of the arsenical gold ores of Hecley, British Columbia, was resumed, and shipments of concentrate carrying arsenic and gold were made from Montague, Nova Scotia.

It is generally conceded that judicious and well-directed advertising is a big factor in promoting business enterprise. During the summer of

The Gallery God

Domestic Relations. The girl one finds it hardest to put anything over on is usually she who has an older brother in the house. And the reason for this is quite simple. As a curious and somewhat cynical on-looker of her brother's doings, she becomes privy to all the tricks in the male repertory and learns to see through the method of attack. moreover, she hears him express his opinions around the house, and she is witness, too, to the manner in which her brother and his friends get together to pow-wow about the girls. This makes her wary lest she be subject to the same treatment, and she becomes sceptical to your professions of affection.

This is not true in the case of a younger brother: a younger brother and everything he does are only a good joke to her.

"Welcome Stranger". More people have come to grief by trying to follow the old Greek adage, "Know thyself," than any other maxim invented by man. If a person does not know all his good qualities he is also ignorant of most of his bad ones. And the moment he turns the spotlight on himself he will find that for every good quality hitherto unknown there are four or five unpleasant new ones. The net result of this investigation will be a morbid brooding over irremediable faults, real and imaginary, and a total discount of the value of his better qualities. How much nearer the truth was Baudelaire when he wrote, "Oh! Lord! God! Give me the force and courage to contemplate my heart and body without disgust."

Chesterfield Musings. 1. I have always been amused by the fellow who tries to make an impression on every girl he meets.

2. The moment a man becomes conscious of a defect in his make-up he begins to take keen pleasure in discovering the same defects in the people he meets.

3. Love-making is the table-manners of the emotions.

4. Nobody gets on my nerves so much as the person who always insists on using common sense.

5. The best test of a civilized man is the manner in which he receives a risqué story.

6. I know of no feeling which is so uncomfortable as when one begins to doubt his ability in matters for which people ordinarily give him credit.

R.R.R.

HOW TO STUDY

These rules of study are taken from the manuscript of the talk given before the student body in the chapel in November by Professor E. A. Miller, head of the department of education.

Physical Prerequisites Of Study

The three factors of keeping in good physical condition are food, sleep, and exercise. Get 8-12 consecutive hours of sleep a day. Take

Fists Falls and Foils

Because of the short notice given the students to enter the boxing eliminations they will not be held until next week and the entry list will be open until Saturday. Although the experienced men are turning out fairly regularly there is not as many contestants for most classes as desired. Most of the winners and others who made good showing in the Tyro and Freshman meets have not put in an appearance since. The only way a good team can be built up is by having all these men turn out and enter all competitions.

The wrestling entry list will also be open this week. All names should be given to Paul Phelps or handed in at practices. More men are needed for the one hundred and ten pound class and also the heavy classes, Clement, MacAvoy, Fisher, Friedman and Murchison are asked particularly to turn out for the practices and enter the competitions. Because of the few who come to practices on Saturdays the time has been changed to Friday afternoon.

1924 a most energetic campaign in advertising Canada's mineral resources was conducted. A large and well diversified exhibit of the economic minerals of the country was made at the British Empire Exhibition and representatives were sent to London from the Federal Department of Mines and from some of the provincial governments. Much specific information was given regarding the mineral resources of the country to men with financial interests and others. Not the least important result of the advertising, however, was the general strong impression that was made on the English public that Canada is a country of immense resources. Such an impression should be an important factor in directing immigration to this country. Capital follows population and population brings capital.

Dec. 13, 1924.

INTERMEDIATE "A" DEFEATED NORTH BRANCH

Bruce.

Defence
Schwartzman Chisloth
Milne Morris
Carmichael

Referee: McRae.
Final Score—McGill 34; N.B.Y.M. C.A. 20.

THIS WEEK'S BILL AT IMPERIAL THEATRE

Ernest Evans, with an unequalled aggregation of talented beauties in his new production "Ripples of 1924" at the Imperial brings one of the finest acts in vaudeville.

Claudia Coleman insists that she is not a mimic or an impersonator but merely a student of human nature. She finds her little studies in everyday life in the hotel cafe, department store, or maybe a street corner—all feminine types, which provide ample comedy entertainment. James Kelly and Emma Pollock are honour graduates of both the old school and the modern school of vaudeville. They have successfully pleased the public for a number of years but neither has reached the stage when birthday celebrations are tabooed. Fun of the clean wholesome variety has always been the keynote of vaudeville, and these popular players are very capable of furnishing as much fun as one can stand.

Eddie Stanley, assisted by Patricia Kennedy, Billy Atkinson and Jack Finney, present "Vaudeville Moments," consisting of bits of most of the things that compose the average bill. There is dancing, singing, comedy and instrumental music. The "This and That" of Senna and Weber are not odds and ends but a very choice and carefully selected repertoire of songs and stories. The material is made exceedingly attractive by the players. Hal Berg and Jack English were for three years the authentic scene doubles of Harold Lloyd and Snub Pollard, and are now appearing on the stage in the same characters, they helped make famous on the screen.

Booth Tarkington's greatest novel, "The Turmoil," featuring Eleanor Boardman, George Mackenzie, Eileen Percy, Pauline Garon, Winter Hall, and Emmett Corrigan, is the photoplay for the week.

your recreation at a regular time, and make it a game if possible. A game holds you in crest and clears your mind.

See that all physical defects of eyes, teeth and throat are corrected.

Material Conditions Of Study
Take pains to have correct light and temperature. The light should not strike the eyes nor cast shadows on the work. Clothing should be loose, chair should be comfortable but upright, and table should be free from distracting influences.

Habits Of Study, Place And Time
As far as possible study by habits. Form a place-study habit; that is, form a place-study habit; that is, have a chair for study and do nothing else there. When you stop, move. Form a time-study habit. Prepare given subjects at given times. Have regular hours for study.

Attitude Toward Study
Begin to study with promptness and vigor. Your attitude, granted above conditions are fulfilled, determines just what you will get out of your studying. The secret is in sitting down with the intention of studying. Intend to learn! Work hard while you work. Do not loaf in your study place. If you are unable to work long, take a rest then return fresh.

In both preparation and classroom, put on the attitude of attention. Intend to understand and remember. Sometimes you must make yourself be interested! This starts a circle, for interest brings knowledge of a subject, and you are always interested in a subject upon which you are informed.

Never blame subject or teacher for lack of interest. There are only uninterested students.

Methods Of Study

Definition.—If you task clearly in mind when you begin work. Review rapidly the work immediately preceding, then make a rapid survey of the advance, getting a general idea of the main points and of the particular parts to be stressed.

—Oberlin Review.

Dack's Shoes for Men

(From Maker to Wearer)

A Difference

You can always buy shoes at a low price somewhere providing you buy just because the price is low—and pay no attention to quality.

Shoes cannot be handed out like dry goods or sugar.

The individual requirements of each customer have to be intelligently considered.

Dack's do not just sell shoes, but practical foot comfort

Dack's don't buy their shoes, they make them.

They don't sell their shoes to dealers—BUT DIRECT TO WEARER.

They have made Dack's shoes for over 100 years.

Dack's have over 100 years' experience in fitting men's feet.

It is economy to wear Dack's Shoes.

VARSITY ONCE MORE WIN IN HOCKEY GAME

Sullivan Stars With Spectacular Stops

4-2

Universite de Montreal Lack- ed Toronto's Shooting Ability

A small but very enthusiastic crowd turned out to see the Toronto Varsity hook up with the University of Montreal sextet, marking the first appearance of the former in this city for this season.

The Montreal lads were determined to win despite the defeat suffered by McGill at Toronto. Varsity sadly missed their star forward Hudson who was unable to make the trip.

The line-up of the teams:

Toronto	U. of M.
Goals	Richer
Sullivan	Defence
Porter	Beaubien
Taylor	Poirier
Plaxton	Centre
Kirkpatrick	R. Wing
Devine	L. Wing
Richards	Sub.
Cloutier	Desy
Goodchild	Beaumont
Referee: Dufresne	

The student rooters cheered their applause as the University team stepped on the ice. They were followed by the blue jerseyed Toronto team. They showed a lot of pep despite the depletion of their ranks. The first score of the game went to Varsity when Plaxton after 15 seconds of play went through the Montreal defence to beat Richer with a waist-high shot. The visitors kept up a steady barrage of shots on the U. of M. goal. Kirkpatrick, of Varsity from a melee in front scored but it was disallowed on account of being offside. U. of M. now began to take their turn at the offensive but they lacked the combination of the visitors and usually ended by shooting raggedly. Nevertheless, Sullivan saved shots that seemed sure goals. Kirkpatrick on a rebound off Devine's shot scored after 7 minutes of play. Varsity 2; U. of M. 0.

U. of M. now came to life and rained shots upon Sullivan with the result that Beaubien, who had been Montreal's star performer, scored on a shot from the right boards. Varsity 2; U. of M. 1.

U. of M. continued their barrage of shots, much to the joy of the rooters, but luck was against the home team and no score resulted. Varsity exhibited their superiority in skating while U. of M. were the superior in stick handling. The period ended with the score still Varsity 2; U. of M. 1.

Varsity enlivened the play in the second period with some brilliant rushes. Their forwards were always dangerous but the Montreal team was back checking strenuously and Varsity often lost the puck at centre ice.

Sullivan the net-minder of the Varsity squad at this time stood out as the hero of the game. He stopped shot after shot that came from the sticks of men who had eluded the defence.

Porter and Plaxton of Varsity began to force the play and Varsity began an offensive that was to result in their ultimate victory. Loose play by the Montreal defence gave Varsity the opportunity of scoring two goals which was a big enough margin to secure a victory. Montreal came back with one more goal but Varsity took no chances and played a defensive game for the rest of the time.

The game ended with the score Varsity 4, U. of M. 2.

Steward on Steamship—Your lunch will be up soon, sir.

Seasick Student—Yea, so will my breakfast.

—Ex.

"My family tree is the richest in America."

"You certainly live up to the family traditions?"

—Ex.

"This cuts me up dreadfully," said the young man as he overslept through three classes.

—Ex.

Breathless Butler: The chauffeur's running away with your wife, sir.

Hen-pecked Husband (yawning)—What's he running for?

—Ex.

Wise—Are you the young lady who took my order?

Waitress—Yes, sir.

Wise—You're still looking well. How are your grand children?

—Ex.

"Aw, git away, kid. I'm saving my kisses."

"If that's the case, I'd like to contribute to your collection!"

C.O.T.C. ORDERS

MCGILL CONTINGENT C. O. T. C. BATTALION ORDERS BY LIEUT. COL. R. THOMPSON. M. C. O. C.

For the week ending January 30th, 1925.

Orderly Officers

Orderly officer, Lieut. G. H. Hyde.

Next for duty, Lieut. G. A. Grier.

Orderly Sergeants

Orderly sergeant, Lieut.-Cpl. M. H. Linton.

Next for duty, Lieut.-Cpl. J. G. Reed.

Parade

The battalion will parade at the Craig Street Armoury on Thursday evening, January 29th, from 8-10 p.m.

Lectures

Cavalry—Wednesday, January 28th.

Orders, Messages and Reports

—Capt. D. A. Grant, M.C.

R.C.D.

Friday, January 30th.

Animal Management—Capt. D. A. Grant, M.C. R.C.D.

Infantry—Monday, January 30th.

Reports and Operation Orders

—Major Greenwood.

Tuesday, January 27th.

Military Law—Major O. S. Tyndale.

The lectures will be held in Room 33 of the Engineering Building at 5.15 p.m.

Promotions

To be Corporal—Lieut.-Cpl. C. H. Herbert, A company.

J. W. JEAKINS

Major, Adjutant.

McGill Ct. C.O.T.C.

Thursday, January 22nd 1925.

On A Portrait Of Faraday

At a recent lecture in the Macdonald Physics Building a portrait of Faraday was shown and a sonnet written by Cosmo Monkhouse was read. Several of those present at the lecture expressed a wish to have a copy of this poem and our readers may therefore also be interested in its appearance in these columns.

Was ever man so simple and so sage,

So crowned and yet so careless of a prize

Great Faraday, who made the world so wise,

And loved the labour better than the wage.

And this you say is how he looked in age,

With that strong brow and these great humble eyes

That seem to look with reverent surprise

On all outside himself. Turn o'er the page.

Recording Angel, it is white as snow.

Ah God, a fitting messenger was he

To show Thy mysteries to us below.

Child as he came has he returned to Thee.

Would he could come but once again to show

The wonder-deep of his simplicity.

—Ex.

THE SIEVE

ON SHIPBOARD

She—Goodness! What is that horrible noise?

He—Why, my dear, that was nothing but the dog-watch barking at a passing cat-boat.

—Ex.

CHAMPION MULTIPLIERS

"There's a man who certainly has hair raising occupation."

"Steeple Jack?"

"No, he owns a rabbit farm."

—Ex.

POLITICIAN TO FRIEND WIFE

P.—Well, dearie, I was elected.

W.—Honestly!

P.—Well, what difference does that make?

—Ex.

The Prof. had written on the back of a theme:

"Please write more legibly."

Next day: "Prof., what is that you put on my theme?"

—Tar Baby

I gave her a box or rouge for Christmas.

Gee, that was pretty flossy presen' wasn't it?

Yes, but I got it all back when she thanked me for it.

—Milton College Review

Tar—"Why can't an Indian shimmy?"

Hiel—"I don't know. Why?"

Tar—"Because his quiver is in the wrong place."

—Tar Baby

"I hear that you've been on the jury. Was it tedious?"

"Well I don't know about it being tedious, but it was certainly very trying."

—Virginia Reel

Crimson—"If Ivanhoe sells for a quart of the Coop, what is Kemil worth?"

Cardinal and Gray—"Great. Scott what a novel question!!!"

—Voo Doo

What's On

TO-DAY

12.00—Arts '27 in Basement.

1.00—Delta Sigma Society in Room 2.

1.00—R.V.C. A.A. in Common Room.

1.30—Arts Undergrad. at Notman's.

2.00—Physiological Society at Notman's.

3.15—Psychological Society at Notman's.

4.00—Red and White Revue try-outs.

5.00—Wrestling Practice.

5.00—Chess Tournament.

5.00—Electrical Club at Notman's.

5.15—Publicity Committee of Revue.

5.20—Dental Undergrad. at Notman's.

5.40—Law Undergrad. at Notman's.

6.30—Dents. I—Sci. I. Basketball.

8.00—Dr. Keenan at Med. Undergrad.

COMING

Jan. 27.

Jan. 28.

Mechanical Club Excursion.

Y.M.H.A.—McGill Basketball.

McGill—Iberville Chess.

Band Practice.

Jan. 29.

Interfaculty Swimming Meet.

Arts Banquet.

M.S.P.E.—Macdonald.

Jan. 30.

Band Practice.

Informal Dance.

Jan. 31.

McGill at Queen's Basketball.

Queen's at McGill Hockey.

Hush, little vampire.

Don't you cry!

You'll get his frat pin

Bye and bye.

—Ex.

George Washington—Yo' say yo' calls yo' cow United States, Why?

Andrew Jackson—Cause she's done gone dry.

—Ex.

Solon—"I see that they have Rivet indicted in the new navy scandal. They said he lied about something."

Solon—"Yes; he had a labri-cated ship contract."

—Ex.

Campus Chatter

Big—What is a polygon?

Ben—A dead parrot.

—Ex.

"One of these fresh young bgs just tried to kiss me. Said he never kissed a girl before."

"What do you do?"

"Told him I was n agricultural experiment station."

—Ex.

Sad One (launily): "Would you like a nice partner for the next dance?"

Glorious One (innocently): "Why yes, bring him up."

—Ex.

A CLEVER LINE

He: What were you doing last night?

She: Oh, helping dad around the house.

He: Drunk again?

—Ex.

I heard that your old man died of a cold drink.

Yes. Poor fellow. A cake of ice dropped on his head.

—Ex.

Sopho: Do you know Poe's Raven?

Frosh—No, what's the matter with him?

—Ex.

Do You?

These co-eds are a noisy lot.

I like 'em;

They make you blow the cash

you've got

like 'em;

They call you tight, they think you're green;

Unless you shell out every bean,

They're the worst darn posts I've ever seen;

I like 'em;

—Ex.

Safe, If Not Safe

"He's wandering in his mind."

"That's all right, he won't go far."

—Ex.

GIVE US TIME

The continual comment upon American educational methods by itinerant Englishmen grows a bit tiresome. The reader of the daily papers is inclined to give a yawn of despair when he comes upon the careful observations of those who have spent a few months lecturing in American universities. The English savants all agree that students lack the essential background of culture, that there is too much laziness, that we drive too many motor cars, and place too much emphasis on the social aspect of college life. And in thus speaking they believe they have made profound observations.

As a matter of fact all persons associated with American education realize this, always providing they have given the matter any thought. It is readily apparent that the majority of our students have no true appreciation of their advantages. The masses who seek education preclude the possibility that even the greater number of them has had an adequate environmental background. In this, English students have great advantage with their centuries of cultured ancestors. They indeed are a picked lot and an upper class.

The most recent discussion of this nation's universities and colleges which has come to our attention is that by the Honorable H. A. L. Fisher, former minister of education in England and recent lecturer in university centres. Before an English audience he commented on our motor cars, our dances, our low intellectual standards, and our splendid equipment, concluding with the contention that "no American university can vie with Oxford or Cambridge in intellectual thoroughness." There can be no question that he is right, but we in America have this advantage. As a comparatively new nation we realize our handicap and look forward to the time when the present generation shall have been the progenitors of real students, when we shall have thousands of cultured men and women instead of a few million persons of mediocre capacity.

Mr. Fisher's most interesting impression is that concerning co-education. "In many of the western colleges," he says, "young women are said definitely to look to college primarily as the opportunity for meeting their future husbands, and only in very secondary degree as a place for education." Whether or not Mr. Fisher was credulous enough to believe this makes no difference—he made such a comment to his English auditors. It may be true that there are among us a few designing females whose sole object is successfully to intrigue a wealthy suitor but they are found everywhere—even in England. Higher education for women on a comprehensive scale is an American innovation of which we are proud. In this respect many western universities be said to vie with English institutions of learning in "intellectual thoroughness."

In full justice to Mr. Fisher it must be said that his comment represented more thorough knowledge and understanding than those of the majority of his compatriots. His ideas may even have some value as a foreigner's impression. But if he and other Englishmen must discuss us, let them be more original than to utter the self-evident truth that universities of centuries of tradition and a picked body of students surpass in intellectual thoroughness those still in the experimental stage who are undertaking the stupendous task of mass education. Give us time!

A DEADLY ANSWER

He (walking by a graveyard— Wouldn't it be ghastly if all the dead people here came to life
